

## **CBT - Engineering Fundamentals Examination (FE Exam) Failures**

Dear Examinee:

This is to inform you that you did not obtain a satisfactory grade on the recent CBT/FE examination. In order to be reexamined in accordance with Chapter 89C of the North Carolina General Statute you are required to pass this examination.

NCEES administers the FE exam exclusively via computer at approved Pearson VUE testing centers throughout the country. See NCEES ([www.ncees.org](http://www.ncees.org)) for registration information and to learn about the registration requirements, exam fees, and additional steps that all examinees must take in order to sit for computer-based exams.

Examinations may be scheduled at your convenience during four testing windows throughout the year: January/February, April/May, July/August and October/November.

The Board of Examiners encourages you to make every effort to successfully complete the examination and licensure process. A candidate with a combination of three (3) failures or unexcused absences shall only be eligible for re-exam after 12 months from the last examination.

For the Board,

Andrew L Ritter  
Executive Director
